

Aicox Soluciones will participate as a sponsor and exhibitor in FEINDEF 2025

The 100% Spanish technology company, a world leader in defence and security, will exhibit its services at a 345m² booth.

Madrid, 17 February 2025. Aicox Soluciones, the leading provider of robust solutions for hostile environments and integrated systems for Defence and Security Forces, will be **present at FEINDEF 2025, the International Defence and Security Exhibition of Spain**, which will take place on 12, 13, and 14 May 2025 at IFEMA (Madrid).

The company, which will share a booth (10C01-B) with its defence and satellite communications partners, will showcase its products and new technology lines for the sector.

Aicox has more than 30 years of experience supplying **technology and telecommunications solutions** with high-added value worldwide, **both for the civil and military markets**. It also has a clear international vocation and achievements in more than 10 countries, such as Brazil and Portugal, and with important customers such as NATO. **Its mission is to optimally integrate the best technologies worldwide, generating operational and competitive customer advantages.**

"Research, development and innovation are part of our genetics, leading the company not only to be a technological benchmark but also to be able to develop its products, providing value in R&D&I, to offer our customers the best solutions in satellite communications, electronic engineering, ISR and radio & jamming solutions for the defense, aeronautics, space and naval sectors", emphasizes its president, Carlos Laborda.

Aicox Solutions

Aicox develops technologies for civil and military communications markets, especially in satellite communications, such as X, Ka, Ku, and UHF fixed and mobile communications terminals for ground vehicles, naval and airborne platforms, tactical LTE/5G systems, and next-generation radio systems (SDR).

It also designs, manufactures, integrates and installs communication and frequency jamming systems in all types of vehicles and command and control systems. Thanks to Adevox, part of the Aicox group, the company has strengthened its presence in C-UxV solutions, Electronic Warfare and Border Surveillance Systems, both maritime and terrestrial.

To adapt to customer requirements, Aicox offers services such as FAT/SAT testing, configuration, network monitoring and dimensioning, satellite capacity management, technical documentation, training and technical support to accompany the customer throughout the life cycle of the systems.

About AICOX

Founded in 1990, it was created to offer customers highly technological solutions with great added value all over the world.
